

You people are going too far. Stop your bullying of broadcast stations. You are trying to take away from us our 1st amendment rights as Americans...the right of free speech. Who are you to tell the country what they can and cant listen to. Whats 'decent' or not. If somebody doesnt like what they are listening to, they can change the channel. Now your trying to stop weather and traffic information....give me a break. This is rediculous.
